In Anatomical Position

17. Surface wounds and injuries—Their nature, position, dimensions (measured) and directions to be accurately stated—their probable age and causes to be noted.

Injury -
Laceration -

Gibellar region - forehead
4x3cm

If bruises be present what is the condition of the subcutaneous tissues?

- Fractures -

- Frontal bone - 4x2cm #

- Rt wrist with # ⊕

- Rt & left orbital # ⊕

- left knee # ⊕

- All thoracic 2nd to 4th Rib # ⊕

- Cervical C2 to C4 # ⊕ distal

- Abrasions -

- Left knee - 5x5cm

- Face - Rt & left mangle 4x2cm

Multiple abrasions all over body ⊕

18. Other injuries discovered by external examination or palpation as fractures etc.

(a) Can you say definitely that the injuries shown against serial Nos. 17 and 18 are ante mortem injuries?

III. Internal Examination—

19. Head—

(i) Injuries under the scalp, their nature.

(ii) Skull—Vault and base—describe fractures, their sites, dimensions, directions, etc.

Frontal bone - 4x2cm - # ⊕

(iii) Brain—The appearance of its coverings, size, weight and general condition of the organ itself and any abnormality found in its examination to be carefully noted (weight M. 3 grams F. 2.75 grams).

Haemorrhage ⊕ below site of laceration
- Rest material is congested, brown

20. Thorax—

(a) Walls, ribs, cartilages

- All thoracic 2nd to 4th Rib # ⊕

(b) Pleura

- Ruptured - All, clots ⊕

(c) Larynx, Trachea and Bronchi.

- filled w/ clots;

(d) Right Lung

(e) Left Lung

} upper & lower lobe crushed w/ clots ⊕

(f) Pericardium

(g) Heart with weight

(h) Large vessels

} clots ⊕, congested, pale

j. Additional remarks

Abdomen -

Walls } Intact, unopened.

Parietalum }

Cavity }

Buccal Cavity, teeth, tongue and Pharynx - mouth closed, tongue inside, teeth clenched.

Diaphragm

Stomach and its contents - semidigested yellowish food material, runniness, approx 50ml ⊕

Small intestine and its contents

Large intestine and its contents - feces & gas ⊕

Liver (with weight) and gall bladder.

Pancreas and Suprarenals } Intact, unopened

Spleen with weight }

Kidneys with weight }

Bladder - Empty

Organs of generation - stool passed, Intact

Additional remarks with where possible medical officer's opinion from the state of the contents of the stomach as to time of death and last meal.

State which viscera (if any) have been retained for chemical examination and also quote the numbers on the bottles containing the same.

Spine and Spinal Cord -

Opinion as to the cause probable cause of death.

Cervical - vertebral
 C2 to C4 # ?
 distension ⊕
 & cord feared.

Sudden cord compression
 in severe neck & spinal injury,
 most probably.

Date 23/12/200

(Signature)
 (Dr. Anand)

*The Spinal Cord need not be examined unless there are any indications of disease. Strychnine poisoning or other.

Note--The report must be written and signed immediately after the examination. Medical Officer should once despatch a duplicate copy to the Civil Surgeon of their district for record in hospital.

Great care should be taken not to cut the viscera before they have been inspected in situ.
