

Intact.

Opinion as to the cause of probable cause of death

The PM findings are inconsistent with that the dead was due to Head Injury with Injury to vital organs with multiple fracture due to RTA.

Dated 02/16/18 199

H. K. Warkye
02/16/18
Medical Officer
Sub-District Hospital
Ramtek, Dist-Nagpur

*The Spinal Cord need not be examined unless there are any indications of disease, or trauma possibly due to injury.
Note.—The report must be written and signed immediately after the examination. Medical Officers will have to despatch a duplicate copy to the Civil Surgeon of their district for record in his office. Great care should be taken not to cut the viscera before they have been inspected.
